INSTALLATION

Installation must be executed by professional installer. The client must provide suitable condition of the floor this product will be installed on.

This is a digital picture for your reference. Please note that the color will display differently on each device. We recommend comparing physical samples

Maintenance:

After dusting, it is sufficient to use a slightly moistened cloth and mild detergent, having care to dry well the surface as water can damage the floor especially if not sealed.
Do not use solvents, acids and ammonia.

All data is subject to our final written confirmation and specific details on the relevant order.
